

Bank Switcher		
Generates address bits A19-A15 based on current CPU address and the bank register.		
Project: XMICRO-6502 U2.1	Chris Weir	
U2.1	3/24/2019 11:04:00 AM	Sheet: 2/6

DMA System

Stops CPU operation on request and releases the bus when safe, then acknowledges the request. An interrupt is triggered for each request.

Project: XMICRO-6502 V2.1

Sheet: 4/6

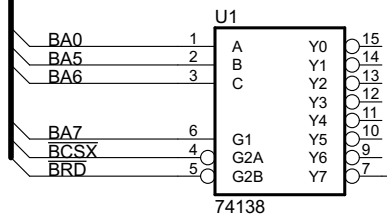

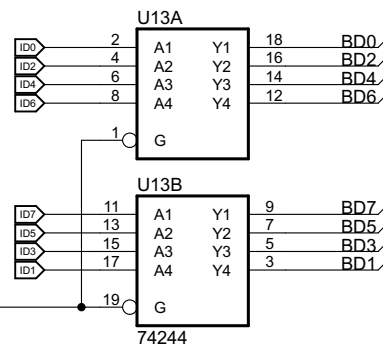

INTERNAL_ADDRESS:A[0..15]

BUS_DATA:BD[0..7]

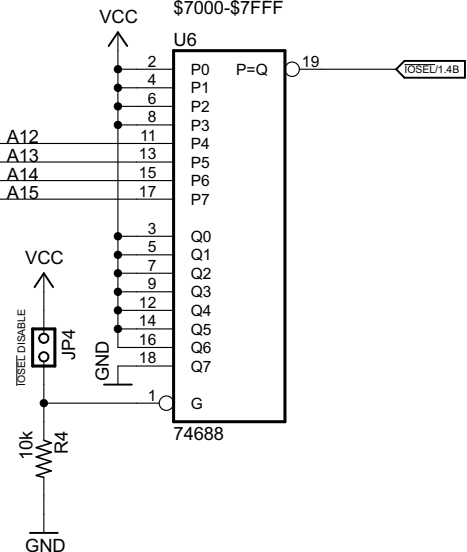

BUS_ADDRESS:BA[0..19],BRD,BWR,BCSX

Card ID Register
\$XFF

IO Comparator
\$7000-\$7FFF

Chip Selects

Generates chip select signals for onboard registers.
IO Comparator generates I/O Select signal.
